Proposed Special Apportionment Regulation Based on Workgroup Suggestions Updated 9/13/16:

Where the denominator of the taxpayer’s receipts factor as calculated pursuant to [Compact Article IV] is less than 3.33% of the taxpayer’s gross receipts [as defined by Model Allocation and Apportionment Regulation IV.2.(a)(5)], the rules set forth herein shall be applied in calculating the taxpayer’s receipts factor. These rules for calculating the receipts factor may also apply, in the discretion of the tax commissioner, in other circumstances in which the apportionment formula does not fairly represent the extent of the taxpayer’s business activity in the state.

1) In the case of any taxpayer deriving gross receipts from interest and investment income, dividends from related parties, or proceeds from the disposition of a business, business segment or capital asset, those gross receipts shall be apportioned as follows:

   (a) Receipts [but not less than zero] from interest and net investment income from the maturity, redemption, sale, exchange or other disposition of [marketable] securities, which shall be included in numerator of the receipts factor for this state to the extent those receipts would be sourced to this state under this state’s financial institution receipts factor rules [or the MTC Model Financial Institutions statute, if this state has not adopted a special apportionment rule or statute for financial institutions];

   (b) Receipts from dividends paid by a related party [as defined in Sec. 17 or other state law], to the extent included in the taxable base, shall be included in the sales factor denominator and included in the numerator of this state by use of the following percentages:

      i) The percentage of the dividend payor’s average apportionment factor [or property and payroll factors] for [this state] for the year in which the dividend was paid, if that information is available, or if not, the most recent year available, or

      ii) Where dividends are paid from earnings in a year other than the year in which the dividend was paid, the percentage of dividend payor’s average apportionment factor [or property or payroll factors] in this state for the year(s) in which those earnings were generated;

   (c) Receipts [but not less than zero] from the sale of capital assets of a business or business segment shall be included in the denominator and shall be attributed to the numerator in [this state] in the same percentage as the business or business segment’s average apportionment factor [or property and payroll factors] for [this state] for the year preceding the sale; provided that, if more than 50% of the value of the assets being sold represents goodwill or other intangible value, using the same percentage of the receipts factor in this state of the business entity or business segment sold.

2) If the taxpayer has gross receipts that are not included in the receipts factor pursuant to Section (1), and the state requires the use of multiple factor apportionment formulas, those gross receipts shall be included in the denominator of the receipts factor and included in the numerator of the receipts factor of this state by the same ratio as the taxpayer’s average property and payroll factors in this state.

Comment [Bj F1]: To conform to (b)(iii)

Comment [Bj F2]: Karen Boucher points out that a taxpayer (e.g., investment partnership) could be engaged in investment activity such that dividends would be considered “receipts” from investment activity, not just gross receipts, since receipt of dividends from investment activity would not fall under Article I exclusion: “…except that receipts of a taxpayer from hedging transactions and from the maturity, redemption, sale, exchange, loan or other disposition of cash or securities, shall be excluded.” Is marketplace for investment activity the location of investors? Would we need to clarify that investment partnerships should source dividend income to partner/investor location as “customer”?

Comment [Bj F3]: Group seem comfortable this provides guidance that Section 2, 3 and 4 applicable only to “other” gross receipts.
3) If the taxpayer has gross receipts that are not apportioned pursuant to Section (1), and if the state apportions income pursuant to the receipts factor only, the taxpayer shall include those receipts in the denominator and shall include those receipts in the numerator for this state in the same ratio as:

(a) the receipts factor of the remainder of the combined or consolidated group if the taxpayer’s income and factors are included on a combined or consolidated return filed in this state; or
(b) the receipts factor applicable to the owner of a preponderance of beneficial interests in that taxpayer, if the taxpayer is filing as a separate entity in this state.

4) To the extent application of the [preceding subsections] fails to result in an equitable apportionment of the taxpayer’s gross receipts, the taxpayer’s receipts factor shall be calculated in a manner which reflects the extent of the taxpayer’s business presence in this state in comparison to other states.

Alternative Catch-alls:

4 (a) To the extent application of the [preceding subsections] fails to result in an equitable apportionment of the taxpayer’s gross receipts, the taxpayer’s receipts factor shall be calculated in a manner which reflects the extent of the taxpayer’s business presence in this state as determined by the percentage of income-producing activity in this state as measured by the costs of performance for that activity.

4 (b) To the extent application of the [preceding subsections] fails to result in an equitable apportionment of the taxpayer’s gross receipts, the taxpayer’s receipts factor shall be calculated in a manner which reflects the extent to which the taxpayer’s income (or loss) was derived from this state in comparison to other states, provided that this method would not result in a substantial portion of the income (or loss) being apportioned to more than one taxing jurisdiction, or not apportioned to any taxing jurisdiction.
