

Definition of Management
Draft 7-13-11

This would be included in the definition section of the current model.

Management. For purposes of determining the INAA loan sourcing elements, management does not mean top management (such as the Board of Directors, President, or Chief Executive Officer), which generally is responsible for controlling and overseeing all the departments in the organization. Management means middle management, which is mainly accountable to the top management for the functioning of their department, division or section.
