

MULTISTATE TAX COMMISSION

To: Executive Committee  
From: Gregory S. Matson, Deputy Executive Director  
Date: June 3, 2011  
Subject: Technology Committee Report

---

The Technology Committee was chaired by Gordon Smead of the Tennessee Department of Revenue from December 2010 until his unexpected retirement in April. The position is currently vacant.

The committee met via teleconferences on December 16, 2010, and March 8, 2011.

The Commission's computing assets and information security structures are appropriately maintained and operational. Virtualization of the data center has been completed for all but two domain controllers and secure messaging server pending renewal of licenses and operating software upgrades.

The website is being improved continually. In the upcoming months we would like to make improvements to contact lookup, a brief bank, navigation, registration process (including payment processing), as well as better content management.

The Commission is still considering the three responses to its Request for Information for the Automated Audit Program Software Project and expects to follow up with the vendors in the near future, in advance of a formal request for proposals.
