

Model Receipts Sourcing Regulation Review Work Group

February 15, 2024 meeting

Meeting Notes (DRAFT)

At this meeting, the work group voted on the motion offered by Laurie McElhatton (California) at the work group's January 24 meeting. A copy of the motion is posted on the MTC website [here](#). The motion passed: 4 votes in favor, 1 vote in opposition, 1 abstention.

As a result, MTC staff will prepare draft alternative sourcing language to source certain transportation receipts. As explained in the motion, this language would not replace the current special industry sourcing models but instead would serve as an alternative model for those states that elect to adopt a deliveries/pickups approach. The motion provides that the Work Group will review and edit the language and that there will be a later vote by the Work Group regarding whether to recommend the final version to the Uniformity Committee.
